Dear Hiring Manager,

I am writing to express my strong interest in the Mobile Application Developer (Android & React Native) position at your organization. With over 8 years of hands-on experience building scalable, high-performance mobile applications, I am confident in my ability to contribute meaningfully to your team from day one.

Throughout my career, I have led and contributed to the full lifecycle of Android and cross-platform mobile applications — from architecture and development to deployment on the Google Play Store. My core expertise includes Kotlin, Java, and React Native, underpinned by strong knowledge of MVVM, Clean Architecture, and Jetpack libraries including Jetpack Compose, Lifecycle Components, and Navigation Component. I have successfully delivered enterprise-grade applications for real-time chat, audio/video calling, audio streaming, and IoT device integration.

In my current role as Team Lead & Senior Android Developer at Nimblechapps, I led Android development for Xpress — a WhatsApp-like messaging application featuring real-time chat, audio/video calling, rich media sharing, chat translation, and AI-powered features using Sendbird. I also managed the hybrid transition of key modules into React Native, ensuring seamless integration with existing native components. Prior to this, at Intricare Technologies, I optimized API performance to load 50+ records in under 1 second and developed real-time audio streaming features using Firebase, Socket.IO, and AWS.

I bring strong cross-functional skills in UI/UX development using Material Design, security implementation (SSL Pinning, OAuth 2.0, JWT, Kiosk Mode), background processing via WorkManager, and performance optimization including ANR fixing, memory leak resolution, and app startup tuning. I am equally comfortable in product-based environments and fast-paced agency settings, having worked across Nimblechapps, Intricare Technologies, and IGEX Solutions.

I am excited about the opportunity to bring my technical depth, leadership experience, and passion for mobile development to your team. I would love to discuss how my background aligns with your needs. Please feel free to reach out at +91 8460263132 or senjaliyapr@gmail.com.

Sincerely,

Paras Senjaliya
