

PARAS SENJALIYA

Mobile Application Developer | Android

+91 8460263132 | senjaliyapr@gmail.com | Ahmedabad, Gujarat

PROFESSIONAL SUMMARY

Senior Android with 7+ years of experience delivering production mobile apps across product and enterprise environments. Led a team of 3 developers at Nimblechapps, building Xpress, a real-time communication platform (messaging, audio/video calls, push notifications) used by live users. Delivered 15+ Android Native apps end-to-end — from architecture through Play Store release — with zero post-launch critical bugs. Specialist in Kotlin, MVVM, Clean Architecture, and secure app design (OAuth 2.0, JWT, SSL Pinning), with a track record of cutting API response times by over 60% through optimized pagination and caching. Open to Senior Android Developer, and Mobile Lead roles — remote or Ahmedabad-based.

PROFESSIONAL EXPERIENCE

Senior Mobile Application Developer

Nimblechapps Pvt. Ltd. | 3 Years 2 Months (Feb – 2023 to Apr - 2026) | Ahmedabad, Gujarat

- Architected and developed Xpress — a real-time communication platform similar to WhatsApp with messaging, audio/video calling, push notifications, and media sharing.
- Built and scaled features using Sendbird SDK, Socket.IO, and Firebase for real-time communication — directly teachable as advanced Android lab projects.
- Mentored and upskilled a team of 3 junior developers through weekly code reviews and architecture workshops, reducing PR iteration cycles by ~30%.
- Delivered Android Native apps: Ramblers, Flex Food, Ray White, ChurchTime, Warmth Matters.

Senior Android Developer

Intricare Technologies | 1 Year 5 Months (Sep – 2021 to Feb – 2023) | Vadodra, Gujarat

- Developed Breakout — a real-time audio streaming and social interaction platform using Firebase, Socket.IO, and AWS.
- Optimised REST API integration with batched pagination and caching, reducing average response time from 3s to under 1s for datasets of 50+ records.
- Built scalable chat and feed systems with smooth pagination — ideal practical lab case studies for GTU students.
- Implemented chat systems, social feeds, authentication flows, push notifications, and media streaming features.
- Worked on Android Native applications including Contact Ninja and Gokios.
- Designed reusable mobile components and integrated REST APIs with optimised response handling and pagination.

Android Developer

IGEX Solutions | 2 Years 2 Months (Sep – 2018 to Nov – 2020) | Ahmedabad, Gujarat

- Built Grapevine Treasure Hunt — an interactive, location-based Android app with customised user journeys using Maps API and GPS.
- Developed LAAVEO Virtual Event Platform, Jap Mala (religious app), Sens2Go, and Grapevine Party Invitations.
- Owned full delivery lifecycle for 15 Android apps from requirements through Play Store release — 0 post-launch critical bugs across all titles.

PROFILES

- **Portfolio:** <https://senjaliyapr.github.io/portfolio/>
- **GitHub:** <https://github.com/senjaliyapr>
- **LinkedIn:** <https://www.linkedin.com/in/paras-senjaliya>

TECHNICAL SKILLS

- **Languages:** Kotlin, Java (legacy)
- **Mobile Frameworks:** Android SDK, Jetpack Compose, Material Design
- **Database & Backend:** Firebase (Realtime DB), SQLite, REST APIs, Retrofit
- **Architecture:** MVVM, MVP, Clean Architecture,
- **Security:** OAuth 2.0, JWT, SSL Pinning, Encrypted Storage
- **Dev Tools:** Android Studio, Git/GitHub, Postman, Gradle, Asana, Basecamp, Vs Code
- **Testing:** JUnit (Unit Testing), Espresso (UI Testing)
- **IoT Exposure:** Bluetooth Beacons, Smart Devices (Locks, Cameras)
- **CI/CD:** Basic understanding of automated build and deployment pipelines

EDUCATION

Bachelor of Engineering (B.E.) — Computer Engineering

Om Engineering College, Junagadh | Gujarat Technological University (GTU) | Ahmedabad, Gujarat

- SPI: 7.5 | Subject: Computer Engineering
- GTU — Gujarat Technological University

PROJECTS

- **Xpress Chat App:** Real-time messaging using Socket.IO + Firebase + Audio and video call
- **Breakout Audio Streaming:** Firebase + AWS integration + Audio streaming
- **Grapevine Treasure Hunt:** Location-based app using GPS + Maps API
- **LAAVEO Virtual Events:** Full-stack Android app
- **Contact Ninja:** Database-driven Android app
- **Ramblers:** Maps API + Firebase + MVVM Android app
- **Flex Food:** UI/UX, Data Handling, Chart, Live Record, Firebase, Stripe payment
- **ChurchTime:** UI/UX, Data Handling, SQL Database, Download documents
- **Sunday Worship:** Media Streaming, Podcast Integration
- **Warmth Matters:** Local Database, Data Storage
- **Gokios:** Kiosk Mode, Device Management, security App
- **Jap Mala:** Custom Logic, Tap Counter, RealTime Database

ADDITIONAL INFORMATION

- Successfully published and managed apps on **Google Play Store**
- Strong problem-solving mindset; quickly resolve technical issues
- Languages: Gujarati (Native), Hindi (Fluent), English (Professional)
- IoT Exposure: Bluetooth Beacons, Smart Devices (Locks, Cameras)
- Project Tools: Asana, Zoho
